

B4002.0050 - Base Kit for RED V-RAPTOR

Set up your RED V-RAPTOR with the core essentials of the LeftField System. Keeping the camera compact & nimble while adding a versatile top rigging surface on a 15mm LWS quick release platform.

Each kit comes with the LeftField QR Baseplate (Standard) & the Sliding Top Plate.

- Compact & lightweight platform - ready to rig with handles, 15mm rods & more
- Sliding dovetail plate allows for faster transition times between setups
- Patented Open•UP quick-release system for snap on, snap off
- Reliable & secure rigging with multiple safety points
- Compatible with RED Monitor Interface

FULL DESCRIPTION

Set up your RED V-RAPTOR with the core essentials of the LeftField System.

Configured to 15mm LWS height standards, the camera is ready to accept 15mm rods and accessories on the base, with a sliding dovetail for handles & other accessories.

The kit provides room to grow and is easily upgradable with side plates, handles, shoulder pad & more.

WHAT'S INCLUDED:

Each Base kit includes the LeftField Universal 15mm LWS Baseplate, LeftField Dovetail Plate, Standard riser for RED V-RAPTOR & the Sliding Top Plate.

NO COMPROMISES

Every part of the LeftField System is machined from single aluminium-alloy billets to create extremely rigid and light weight components. All of which play perfectly to the strengths of the RED V-RAPTOR.

Absolutely no compromise has been made in our manufacturing process. Our engineering is focused on creating products that are both high-performance and enabled with a longer life of service. Combine that with unparalleled level of Bright Tangerine support, and your LeftField V-RAPTOR System becomes the most reliable and hard-working partnership that any filmmaker could wish for.
